Crop Research Foundation of Wyoming

May 18, 2012

To: Potential Wheat Seed Growers
Re: Possible Varietal Release

The Crop Research Foundation of Wyoming (Foundation) wishes to alert you to the possibility that Foundation seed of a variety from the Colorado Wheat Research Foundation, listed in variety trials as CO 050322, may be available for planting in the fall of 2012. While we have determined the fee schedule to produce this seed, \$300 in the first year of release, \$500 in the second year of release, and \$700 in the third and subsequent years of the release, we have yet to set a price for the Foundation Seed.

The Foundation will be evaluating quality and yield results from the ongoing variety trials during August 2012, with an announcement forthcoming if the variety will be released. We anticipate that 200 bushels of the Foundation seed will be available, and will consider criteria for allocation of seed, if more seed is requested than the available supply, at our Foundation meeting on June 21, 2012. If released, it is likely that the Foundation will seek a PVP Title V certificate for CO 050322.

We would appreciate an indication of your intentions, using the contact information above, no later than June 19, 2012. If you wish to review the past years variety trial results for CO 050322, please visit:

<http://www.uwyo.edu/plantsciences/uwplant/variety-trials/wheat.html>

and: <http://wheat.colostate.edu/CSUWheatBreeding/Database.html>

If you have further questions, please do not hesitate to contact us.

Sincerely

Keith Kennedy, Secretary
Crop Research Foundation of Wyoming
